

EXPERT HORSE RACING HANDICAPPING!

May 1, 2026

Good Morning Turf Club Members,

SANTA ANITA – 04/30/2026 – LISTED 50 CENT PICK 5 PAYS - \$24,511.90!

Wow! The powerful **Trackpro Value Rating (TPV)** algorithm listed every single winner on the Santa Anita card yesterday including the blockbuster late **50 cent PICK 5 (3 x 4 x 1 x 2 x 2)** in R9 that paid a wallet-busting **\$24,511.90!** The **50 cent PICK 4** in R9 returned a hefty **\$3,619.30!** The **\$2.00 PICK 6 (3 x 3 x 4 x 1 x 1 x 2)** was listed in the **Trackpro** handicapped report, but nobody hit it, so the carryover for today is a massive **\$157,156.00!** The **TPV** algorithm does have some bad days every once in

awhile, but yesterday was certainly not one of them! In fact, **Trackpro** is absolutely amazed on how the **TPV** manages to find overlooked horses for subscribers that absolutely explode the horizontal payoffs! So let me get right

into the handicapping so that the **Turf Club** can see for themselves the power of Comprehensive Expert Handicapping in action! The entire Santa Anita report has been published on the website for review.

There are a few impressive things to note about the winning **Trackpro** selections listed in the table above:

- 1) In R6, the longshot #3 COURTSIDE ACTION (**\$28.80**) listed fourth in the report, was sired by STRAIGHT FIRE, and was marked with two Pedigree Handicapping Tools! Read the following from the website: The **Trackpro TPV** algorithm parses the Brisnet Pedigree Ratings in the following categories: The Fast (Dirt) Pedigree rating measures the quality and suitability of the horse’s breeding for races run on the dirt. The Distance Pedigree rating measures the overall quality and suitability of the horse’s breeding for races run at today’s distance. The Turf Pedigree rating measures the quality and suitability of the horse’s breeding for races run on the turf. Brisnet Pedigree Ratings Calculation: Based on an analysis of hundreds of thousands of starts in North America, each start of all offspring from the sire, dam, and damsire are evaluated and measured for their individual racing aptitudes and preferences. Unlike other pedigree ratings, which merely reflect win percentages or earnings, the BRIS Pedigree Ratings utilize a vast array of performance rating tools (Speed Ratings, Class Ratings, Power Ratings, etc.) to accurately measure the actual improvement or decline each offspring displayed at different distances and surfaces. The net result of this exhaustive compilation is the

most accurate, comprehensive, and predictive pedigree ratings available to handicappers. When the **Trackpro TPV** algorithm finds a horse with an above average morning line that it thinks can win the race based on any of the pedigree ratings set forth above, it will mark the horse as a **Pedigree Power Play (--)**.

From the Thoroughbred Daily News *“Bred by Spendthrift Farm, Straight Fire was a \$250,000 yearling purchase by Solis and Litt Bloodstock at the 2015 Fasig-Tipton July Sale. He was sent to Eddie Woods and showed promise from the start. “We thought he was special,” Jason Litt recalled. “The horse always had a great attitude. He loved to train and was easy to be around. When we got him to the track, he was tremendously fast and naturally precocious.” As a juvenile, the colt broke his maiden second time out at Del Mar by 10 ½ lengths to earn his 'Rising Star' badge. He was then second to MGSW Klimt (Quality Road) in the GI Del Mar Futurity and ran third in the GI FrontRunner S. While he suffered a career-ending injury and was unable to return to the starting gate as a 3-year-old, his connections were so impressed by his juvenile campaign that they pursued a stallion career for their precocious bay.*

- 2) In R9, the longshot #2 KINGTRIGUE (**\$37.80**) listed second in the report, and sired by MCKINZIE, was also marked as a **Pedigree Power Play (--)**. **Trackpro** has mentioned many times in this newsletter the importance of taking into consideration pedigree when handicapping, and the power built into the **TPV** algorithm takes full advantage of this information. It certainly paid off yesterday at Santa Anita for subscribers when the listed three dollar PICK 3 (**1 x 2 x 2**) in R9 returned a fantastic **\$1,653.00!** And the listed **50 cent** PICK 4 (**4 x 1 x 2 x 2**) in R9 returned an incredible **\$3,619.30!** From *Gainesway Farm on sire MCKINZIE: “He is a gorgeous physical with brilliant speed and stamina. I’ve only had one other horse in my career that has been able to accomplish what he’s done by **winning a G1 at two, three, and four.** It takes an extraordinary horse to achieve that.” – Trainer Bob Baffert. McKinzie is out of Runway Model, who is a dual Grade 2 winner that was third in the Breeder’s Cup Juvenile Fillies (**G1**) at two, who was second in the Ashland Stakes (**G1**) and sold to Summer Wind Farm for \$2.7 million. His sire Street Sense is responsible for no fewer than eleven Grade 1 winners, McKinzie being the **most decorated of Street Sense’s progeny.** McKinzie has amassed nearly 3.5 million in earnings, ran 11 triple digit Beyers, tallied four Grade 1 victories and additionally was runner-up in four more Grade 1 contests.*

- 3) From the nine listed winners in the Santa Anita handicapped report, two winners were listed on TOP which generated a flat bet profit of **+\$5.40** for each two dollars wagered.
- 4) The listed two dollar Daily Double (**4 x 1**) in R7 returned **\$152.80**, and the winning horse in both legs was ridden by jockey Ricardo Gonzalez (**10.29%**). So never dismiss a horse just because the jockey may have a relatively low win percentage. And the same advice pertains to the trainer also!
- 5) Two of the winners on the card were marked with the Trackpro **Notable Trainer Angle (a)** tool. In R4, the #6 HARNEY LANE (**\$9.80**) was showing this trainer angle: **Down 2+ classes (40) - 25.00%**. Note also that this five year old mare had previously raced just six days ago! Horses that have raced recently are generally in good physical condition, so this factor is marked in the reports with the **Recent Race (r)** symbol. In addition, many times a shrewd trainer will bring the horse right back to the races within a week or two to take advantage of the form of the horse. It is obvious that horses returning to the race track relatively soon after a race are usually well-meant, and this is definitely a positive sign and an important handicapping factor to note. And in R7, the #4 SAREEHA (**\$13.00**) was marked by the **TPV** for this trainer statistic: **2nd off layoff (169) – 19.53%**. *So subscribers should pay close attention to horses marked with any of the powerful **Trackpro Handicapping Tools**, and especially the pedigree tools found nowhere else on the internet! Hats off to the TPV for the outstanding handicapping that brought home the PICK 5 shown below:*
